From: Director

Subject: Application for Approval of Recreational Use Plan for FPC  
Project No. 2307, Salmon and Annex Creeks, First Judicial  
Division, Alaska

Your memorandum of \_\_\_\_\_ requested our comments on  
the above application.

Salmon Creek Reservoir is located about 3 miles north of Juneau, Alaska,  
and Annex Creek Reservoir is about 10 miles northeast of Juneau. The only  
access to both reservoirs is by air or foot-trail. The U.S. Forest Service  
and the Alaska State Division of Lands are responsible for recreation  
planning on lands in the project areas.

The following language should be included in the Departmental letter to the  
Federal Power Commission:

The Fish and Wildlife Service has reviewed the recreation  
plans of the licensee for Salmon Creek and Annex Creek  
reservoirs and the August 3, 1967 letter from the licensee  
to the Federal Power Commission. Following consultation  
with the Bureau of Outdoor Recreation, and after meeting  
with the U.S. Forest Service and the Alaska State Division  
of Lands, we are in agreement that the following recreation

facilities should be constructed by the licensee:

Salmon Creek Reservoir: 4 picnic tables, 2 fireplaces,

1 garbage pit, 1 single seat toilet, and 1 aluminum boat to be located near the right abutment of the dam; and 1 A-frame cabin, 1 garbage pit with top, 1 single seat toilet, and 1 aluminum boat to be located at the upper end of the reservoir.

These facilities shall be maintained by the licensee.

Annex Creek Reservoir: 1 A-frame cabin, 1 single seat pit toilet, 1 heavy plank table, 1 garbage pit with top, 1 flip-up fireplace, and 2 aluminum boats. The Forest Service has indicated they will be responsible for the administration and maintenance of facilities at Annex Creek Reservoir.

We believe that the proposed facilities would be adequate to accommodate persons now utilizing the fish and wildlife and recreational resources of the project areas, and recommend that they be provided as soon as possible.
